

Contents

Chapter 1 : Introduction	1
1-1. Background	1
1-2. Epitaxial growth of GaAs on Si	3
1-3. Application to devices	7
1-4. The purpose and organization of this dissertation	9
References	11
Chapter 2 : Waveguide properties of GaAs on Si	15
2-1. Introduction	15
2-2. Sample preparation	15
2-2-1. Design of the waveguide	17
2-2-2. Sample structure	19
2-3. Near field patterns	24
2-3-1. Measurement method	24
2-3-2. Near field pattern of the slab waveguide	24
2-3-3. Near field pattern of the ridged waveguide	27
2-4. Propagation loss	28
2-5. Conclusion	33
References	35
Chapter 3 : Quantum well properties of GaAs on Si	36
3-1. Introduction	36
3-2. Observation of the QW of GaAs on Si	37
3-2-1. TEM observation	37

3-2-2. Photo-Luminescence (PL) spectra	
observation	37
3-3. The absorption energy at the room temperature	41
3-3-1. Calculation of the electron-hole	
energy	41
3-3-2. Photocurrent spectra measurement	42
3-4. QCSE of GaAs/AlGaAs on Si	47
3-4-1. Quantum confined Stark-Effect (QCSE)	47
3-4-2. Measurement	51
3-4-3. Obtained properties	51
3-5. Conclusion	55
References	59
Chapter 4 : Application to the optical switch	62
4-1. Introduction	62
4-2. Sample preparation	63
4-2-1. Structure of the sample	63
4-2-2. Propagation loss	66
4-3. Properties of the switch	69
4-3-1. I-V characteristics	69
4-3-2. Applied voltage and the light	
transmission	71
4-4. Application to the switch for 850nm	
wavelength	76
4-5. Integration of InGaAs laser with optical	
switch	82
4-6. Conclusion	89
References	92

Chapter 5 : Application to the phase modulator	93
5-1. Introduction	93
5-2. Refractive index	93
5-3. Sample preparation and measurement	96
5-4. Results	98
5-5. Conclusion	101
References	106
Chapter 6 : Summary	107
 Selected Papers	 113
