

目次

1. Si 基板上的縦型 GaN 系デバイスと GaN における欠陥解析に関する研究	1
2. 本研究に関連した発表・論文	71
[1] Effect of Drift Layer on the Breakdown Voltage of Fully-Vertical GaN-on-Si p-n Diodes	71
[2] Demonstration of fully vertical GaN-on-Si Schottky diode	75
[3] Challenges in growth for GaN power electronics (The 2018 GaN power electronics roadmap) ...	77
[4] Al ₂ O ₃ /AlGa _N Channel Normally-Off MOSFET on Silicon with High Breakdown Voltage	81
[5] High-performance ultraviolet photodetectors based on lattice-matched InAlN/AlGa _N heterostructure field-effect transistors gated by transparent ITO films	85
[6] Post-deposition annealing effects on the insulator/semiconductor interfaces of Al ₂ O ₃ /AlGa _N /Ga _N structures on Si substrates	89
[7] Electrical characteristics and interface properties of ALD-HfO ₂ /AlGa _N /Ga _N MIS-HEMTs fabricated with post-deposition annealing	94
[8] Understanding of frequency dispersion in C-V curves of metal-oxide-semiconductor capacitor with wide-bandgap semiconductor	99
[9] Impacts of oxidants in atomic layer deposition method on Al ₂ O ₃ /Ga _N interface properties	103
[10] Redshift and blueshift of GaNAs/GaAs multiple quantum wells induced by rapid thermal annealing	108
